There is no charitable read available for MrsFluffyCuffz, sitting at 5th percentile in the field and dead last in the Batman: Arkham Asylum division, and the draft board tells you exactly why. Four major reaches in a single draft is not bad luck, it is a pattern, and the pattern here is panic. The most glaring example is Drake Maye, taken a full round early at 1.06 despite being a QB2 in a positionless format where quarterbacks can wait. Yes, Maye is a legitimate star, and yes, the addition of A.J. Brown gives New England something it has been missing for years, but reaching for a stack before the market even cracks open is the kind of move that costs you everywhere downstream. Sure enough, the receiver group beyond Brown (WR8) craters fast, with Makai Lemon at WR40 and Jayden Higgins at WR54 rounding out the projected starters, both of them reached for as well. When your draft philosophy leaves Blake Corum as your weakest projected starter and the medicine cabinet is already bare, the prognosis is grim.

There is no kind framing for what jrfootballnerd put together in this draft, and the numbers do not ask for one. Zero steals, zero values, nine chalk picks, and two major reaches is a résumé that belongs in a cautionary tale. The most damning entry is RJ Harvey, hauled in nearly three rounds ahead of his ADP and slotted as a projected starter despite landing as RB28, the weakest projected contributor on the whole roster. That is not aggressive drafting, that is paying full price for something that was available at clearance. The other major reach, Jayden Daniels at QB5, compounds the damage because Lamar Jackson already projects as QB3 on the same roster, so the second quarterback investment was unnecessary before it was expensive. The Lamar Jackson and Zay Flowers stack is a genuine bright spot, and a QB3 anchor is nothing to dismiss, but jrfootballnerd enters 2026 sitting 11th in the Batman: Arkham Asylum division and in the bottom 10 percent of the field, carrying the weight of a draft that never found a bargain.

Last year's 91st-percentile finish will do strange things to a manager's confidence, and ClassicMiKeTFFN apparently spent the offseason believing that confidence was the same thing as judgment. The draft tells the story plainly: zero steals, zero values, nine chalk picks, and five reaches, including two that qualify as major. Justin Herbert, projected QB8, got grabbed nearly a full round early, which is a curious place to spend draft capital on a quarterback when the format lets you field almost anything. Then, deep in round thirteen, when patience is essentially free, ClassicMiKeTFFN burned three-plus rounds of relative value on Deebo Samuel, a WR70 projection. The surrounding cast offers some relief, Ja'Marr Chase at WR2 is legitimately elite, but the projected starter pool leans on Javonte Williams at RB17, Cam Skattebo at RB20, and Quinshon Judkins at RB22, a trio of middling projections held together by hope. Sitting 10th in the Batman: Arkham Asylum division and in the bottom 15 percent of the field, this roster looks less like a defending contender and more like a cautionary tale drafted in real time.

jaglio16 drafted like someone who read every ADP chart and followed the discipline almost perfectly, with nine chalk picks, a steal in C.J. Stroud at QB22 falling more than two rounds, and a solid get in Dallas Goedert sliding a round past his number. The roster should reflect that patience. It mostly does not. Christian McCaffrey at RB3 and Jonathan Taylor at RB4 form a genuinely elite foundation, and Malik Nabers at WR12 and Tee Higgins at WR19 are starter-caliber contributors, but the rest of the projected starters, Goedert at TE15, Mike Evans at WR27, and Stroud at QB22, are the kind of names that fill a lineup without elevating it. That is the quiet cruelty here: jaglio16 executed the draft correctly by most measurable standards and still landed at 9th in the Batman: Arkham Asylum division and the 33rd percentile of the field. The process was sound. The ceiling just was not there to find, no matter how many rounds past ADP you waited to find it.

TE: Juwan Johnson (TE20 | \$4 | 11.08), Kenyon Sadiq (TE21 | \$3 | 12.05)

TheFantasyFive did almost everything right in the draft room. Twelve of their picks landed at or after ADP, Tony Pollard fell a staggering 3.2 rounds before they scooped him, and the wide receiver corps reads like a fantasy manager's vision board, with Jaxon Smith-Njigba at WR3, Chris Olave at WR11, and Ladd McConkey at WR20 all projecting as starters. The cruelty is that the math still doesn't cooperate. Pollard projects as RB30 and Rico Dowdle as RB32, meaning the two players who most need to anchor a lineup are both fringe starters on a good day. Michael Pittman lands in Pittsburgh alongside DK Metcalf on an offense still searching for an identity behind a 43-year-old Aaron Rodgers, which is not exactly the situation you want for your WR44. Good process, thin margins, and a tournament percentile sitting at 39th: TheFantasyFive drafted the way the textbooks say to and arrived at a roster that rewards them with almost no room for error before the season even kicks off.

AngadUppal147 sits at 42nd percentile and sixth in the Batman: Arkham Asylum division, which is exactly the kind of roster that makes you nervous rather than excited. The foundation is genuinely good: Omarion Hampton (RB9), Jeremiyah Love (RB13), Breece Hall (RB14), and Brock Bowers (TE1) give this team a core that can put up real numbers on any given week. The problem is what surrounds it. Khalil Shakir (WR51) is the projected weakest starter, and when a WR51 is your margin for error, the margin is thin. The draft tells a similar story of mixed signals: Hampton was taken nearly a full round early, Jonathon Brooks (RB37) was a major reach at 2.5 rounds, and yet Matthew Stafford (QB14) fell a full two-plus rounds into Angad's lap as genuine value. This team does not need everything to go right, but it needs enough to go right, and in a field this competitive, that is a harder ask than the good players on this roster make it look.

TE: Terrance Ferguson (TE28 | \$1 | 13.11)

There is no polite way to frame lewishall's 2026 outlook: this is a roster built on a foundation that keeps cracking the deeper you look. The receiver group has genuine star power, with Amon-Ra St. Brown (WR4) and CeeDee Lamb (WR5) anchoring a corps that looks the part on paper. But the format is positionless, which means the rest of the roster has to hold up its end, and it simply does not. Kyler Murray (QB19) and Aaron Rodgers (QB29) form one of the weakest quarterback situations in the field, and Terrance Ferguson (TE28) offers nothing to offset it. The draft did not help matters: thirteen chalk picks and zero identified steals or values left no margin for error, and the one major reach, Josh Downs at WR46, taken nearly two and a half rounds early, burned draft capital on a player projected to sit on the fringe of the starting lineup anyway. A 44 percent win rate and 37th-percentile scoring in 2025 set the floor, and nothing here suggests the ceiling is much higher.

TE: Dalton Schultz (S) (TE22 | \$3 | 10.08), AJ Barner (TE24 | \$2 | 11.05)

BSherlockk arrived at this draft with a plan and refused to let the board talk them out of it. The evidence is everywhere: four minor reaches, one major reach, and exactly zero steals. The board kept telling them to wait, and they kept ignoring it. The remarkable thing is how little it cost them. James Cook at RB5 and Saquon Barkley at RB8 give this roster a genuine one-two punch at the top, and the Josh Allen and D.J. Moore stack layers in a ceiling-raising connection that could win weeks outright. Ja'Kobi Lane is the confession buried at the back of the draft, taken 5.2 rounds ahead of consensus at WR89, which is exactly the kind of move that looks either prophetic or reckless depending entirely on how the season unfolds. A 36th-percentile finish in 2025 makes BSherlockk a team that needed this draft to go right, and mostly it did. Landing at 51st percentile suggests a real step forward. Whether the conviction that drove those reaches is wisdom or stubbornness, the roster is better for it.

Bad Company lands at 72nd percentile in the field, and when you trace how they got there, the story is less about any single lightning-bolt pick and more about a draft that simply kept winning small. The clearest example is the tight end pairing: Trey McBride came off the board at 1.12 when his ADP sat at 1.08, a near-miss that still landed a TE2, and Isaiah Likely followed later as a full round-plus of free equity at TE13. Stack those two against almost any other roster and Bad Company is already ahead on that position alone. Up top, Justin Jefferson arrives as WR6 with something to prove, having spent 2025 grinding through a rough pairing with JJ McCarthy in Minnesota. The Vikings addressed that problem aggressively, bringing in Kyler Murray, and if Jefferson rebounds the way most projections suggest, Bad Company is holding a WR6 who may be undervalued even at that number. This roster did not win any single round of the draft. It just quietly won enough of them.

kmkilleen didn't need a blockbuster moment to build one of the better rosters in the Arkham Asylum division. The draft was almost relentlessly sensible, twelve chalk picks that landed exactly where they should, and then a pair of values that quietly made the whole thing click. Colston Loveland at TE3 is the clearest example: taken at 2.12 with an ADP of 2.08, that is not a steal so much as a manager who knew exactly what he wanted and went and got it. The receiver group is where the cumulative advantage really shows up, with Puka Nacua projecting as WR1 and George Pickens right behind him at WR10, and then Jaylen Waddle, Carnell Tate, and Christian Watson all projecting as starters behind them. Tate in particular carries real upside, drafted fourth overall in the NFL and immediately handed the keys to a Titans offense built around Cam Ward. Coming off a 32nd-percentile scoring season in 2025, kmkilleen didn't swing for the fences this time. He just kept hitting singles until the scoreboard looked like something worth respecting.

lukekendall lands at second in the Batman: Arkham Asylum division and the 88th percentile of the field, and the draft tape explains exactly why. The foundation is genuinely elite: Bijan Robinson at RB2 and Ashton Jeanty at RB7 give this roster a top-end that most managers would sign for immediately, and Kenneth Walker III at RB10 keeps the ceiling high even if one of them stumbles. What separates lukekendall from a manager who simply picked well early is the ability to find value deep in the draft. Josh Jacobs, a projected RB16, came off the board a full round and a half after his ADP. Rhamondre Stevenson at RB31 arrived more than three rounds late. Dak Prescott at QB7 slid nearly two rounds past where he was expected to go. None of these were lucky windfalls on a single pick, they were a pattern of a manager who stayed disciplined, trusted the board, and consistently walked away from the table with more than he paid for.

There are drafts you pick apart looking for the cracks, and then there are drafts like YHNYDad's, where you keep looking and keep coming up empty. Division-leading, 99th-percentile clean, this roster was built with the patience of someone who knew exactly what the board owed them and waited until it paid. Jahmyr Gibbs at RB1 and De'Von Achane at RB6 anchor the enterprise, with Achane sliding to YHNYDad a full seven tenths of a round late. Kyle Pitts landed at TE7 and Sam LaPorta at TE8, each falling over a round past their respective ADPs, turning what could have been a routine position into a genuine advantage. The one cloud on an otherwise spotless horizon is Marvin Harrison Jr., a WR33 projection carrying legitimate questions: two underwhelming seasons, a brutal injury ledger last year, and Jacoby Brissett now under center in Arizona. But even that concern is softened by a roster deep enough that Harrison doesn't have to be the answer, only a piece of it. YHNYDad didn't get lucky. They got disciplined, and the two look identical from the outside.
